Summary

Versatile software engineer with strong foundations in full-stack web development, cloud-native microservices, and LLM-powered solutions. Currently interning at Clarovate, building scalable systems using React, TypeScript, NestJS, and Docker. Passionate about using AI and automation to create high-impact software products.

Education

Vishwakarma Institute of Information Technology

Bachelor of Technology in Computer Science and Engineering | 8.73

Institute of Petrochemical and Engineering

Diploma in Computer Engineering | 9.42

Pune, India

2022 - Present

Lonere, India

2019 - 2022

Experience

Software Engineering Intern

Jan 2025 - Present

Clarovate (Startup)

Pune

- Working as a Software Engineering Intern, focusing on React, TypeScript, and Nest.js.
- Developing and maintaining web applications, utilizing MongoDB for database management.
- Using Docker for containerization and Git for version control in an agile environment.
- Collaborating with cross-functional teams to implement features and enhance application performance.

Workshop on Networking, MySQL

Sept 2022 - Oct 2022

Kopran Research Laboratories Ltd.

Mahad, Raigad

- Completed a one-month workshop on web development, organized by Kopran Industries' IT Department.
- Developed proficiency in modern web development frameworks and tools, including HTML, CSS, and JavaScript.
- Gained practical experience in designing, coding, and deploying web applications.

Projects

CLAROVATE (Lead Generation Campaigns) | React, TypeScript, NestJS, CI/CD, Docker |

2024-2025

- Developed a web application to automate lead generation campaigns with CI/CD pipelines using Git and GitLab.
- Built a robust solution with React (TypeScript) frontend and NestJS backend, employing JWT and bcrypt for secure authentication, plus email automation with NodeMailer and Email Blaster.
- Deployed the application with Docker and used Agentic RAG for AI-based query generation.

DATA SERVICE APPLICATION | TypeScript, Node.js, MongoDB, Openrouter API |

2025

- Built a scalable data service app in TypeScript and Node.js for bulk CSV ingestion of company and contact records.
- Implemented smart field mapping (mandatory, semi-mandatory, optional) with validation and task creation for incomplete entries.
- Integrated OpenRouter API to auto-fill missing fields via AI prompts, cutting manual data entry by 60%.

MEDIA-X | React, Tailwind CSS, NodeJS, Flask, Axios |

2024

- Designed an intuitive UI for trending analysis and content uploads, improving user engagement by 20%.
- Built a dynamic analytics dashboard using **Chart.js** and integrated APIs from **Google Trends**, enabling trend tracking.
- Automated content posting across platforms like YouTube, Instagram, X, and Facebook, reducing manual effort by 50%.

Publications

Machine Learning-Based Expert System for Online Admission

2024

Scopus

- Developed an intelligent system leveraging machine learning algorithms to streamline the online admission process.
- Achieved an accuracy rate of 95% in predicting suitable candidates for various courses.

Technical Skills

Languages: C++, Java, Python, JavaScript, Node.js, SQL

Frameworks: ReactJS, TailwindCSS, Flask, ExpressJS, NestJS

Developer Tools: Git, GitHub, Gitlab, Docker, Postman, Figma, AWS, Jenkins, PuTTY, Caddy, Automation Anywhere

Technologies: Microservices, Cloud Computing, Agentic RAG, LLMs, OCR

Databases: MongoDB, MySQL

Operating Systems: Linux

Leadership / Extracurricular

GDSC Marketing Lead

2023 – Apr 2024

Google Developers Students Club

VIIT, Pune

Event & Management Lead, Techexplorer

2022

IOPE DBATU

IOPE DBATU, India
